

Plainsboro in 100 Years

By Yi Qu

Plainsboro will change A LOT in 100 years! Here is what I think Plainsboro will look like in 100 years.

The Plainsboro Public Library will be open 24 hours straight and even in bad weather! The library will be open with robots supporting the people that come in. People will check out the books by choosing a book, then letting the Robots scan their face, just like they do in China. By doing that they will put the book that you are choosing into your check out list at home. There will also be robots helping people not only at the desk but all around the library.

Our recreation center will have more people of different cultures from around the world. That includes parents, kids and seniors. People won't have to worry if they don't speak English, because there will be headphones they can use to talk with the other people from other countries. It works like this: the headphone will have a translator in them. I suggest you choose the language you want the headphone to translate. Don't worry about it being crowded because you will just have to speak to the closest person to you and it will not mess up!

Schools will be mostly the same but there will be some differences. One of the differences will be that there will be new subjects to learn about. Some of the new subjects will be taught by robots. Or maybe the whole school will be taught by robots! But there's one thing that we should not change: and that is going to school it is because then if we only communicate on computers/phones it will be bad. It will be better if we communicate physically.

Our transportation will be really different. The cars will all be automatic. The cars will be hovering in the air. There will be cars in the air and cars on the ground. The garbage trucks will not be driven by people anymore. Instead, they will be driven by robots. It will be the same for the truck that sends mail, the truck from amazon and lots more. The cars will have to respect the men, women and children that cross the road. There will be less traffics and car accidents. Last but not least I want to remind you that because of the reasons I just explained there will be safer transportation and a more advanced type of transportation.

In 100 years, the people living in Plainsboro, New Jersey will have a life that is fun and advanced and, last but not least, they will always be happy. Now you know what I think Plainsboro will look like in 100 years. Guess what that is the end. I hoped you enjoyed reading this essay and I can't wait to see what the future holds for me!
